

CRANK SELECTOR USAGE GUIDE

GUIDE TO THE INTENDED USE FOR OUR RANGE OF CRANKSETS.

- Rider + Bike Weight: 90kg
- Rider + Bike Weight: 90-110kg
- Rider + Bike Weight: 110-130kg

NOTES:

>> Crank selection will be influenced by chainline and Q-factor requirements. Please consult the relevant chainline and clearance charts for more information.

>> Cross over zone where some bikes can be fitted with cranks to suit 91mm or 96.5 over bearing width and achieve desired chainline and crank clearance.
